Understand Your Phone

SIM and Memory Card Insertion

Your Q391 is a dual SIM phone with expandable memory. This handset supports Micro SIM card only.

Switch off your phone before SIM/memory card insertion/removal and insert the card(s) in the slots correctly.

1. Switch off your phone and remove the rear cover, as illustrated below.
2. Insert the SIM card(s) in the card slot(s).
3. Insert the memory card in the memory card slot.
4. Please keep the SIM card out of the reach of children.

The card and the contacts are vulnerable to damage due to scratching or bending. Therefore, be careful when inserting or removing the cards.

Use only compatible memory cards with this device. Incompatible memory cards may damage the card or the device and corrupt the data stored in the card.

Handset Keys

Power Key

- **Turn On** - Press the Power key for 3-4 seconds.
- **Wake up the Screen** - Firmly press the Power key to wake up the screen or to turn off the screen.
- **Turn Off** - Wake up the screen first. Now, long press the Power key then tap 'Power off' to turn off.
- **Quick Options** - Wake up the screen first. Now, press the Power key for 2 seconds to view quick options.

Volume Keys

Adjust the in-call, media, and ringtone volume from the volume keys available on the right side of the device.

Navigation Keys

- Opens a menu with items that affect the current screen or application.

- While you are on the home screen, tap to view quick access options.
- Long tap to open the most recently used applications.

- Opens the Home screen. If you are viewing any of the extended Home screens, opens the main default Home screen.
- Long tap to open Google Now.

- Takes you to the previously opened screen until the Home screen appears.
- If the onscreen keyboard is open, closes the keyboard.

Charge the Battery

Before using the device for the first time, we recommend you to use the power adapter to charge the battery for atleast 12 hours.

Connect the power adapter to the power outlet and the USB cable, as illustrated in the following image:

When turned on, the battery level and charging status gets displayed in the upper-right corner of the screen.

Use only Micromax chargers and cables. Other chargers or cables can cause the battery to explode or damage your device. This may invalidate your phone warranty.

Home Screen

You can personalize your home screen with shortcut icons, widgets, and wallpapers. To view each panel, just swipe to the left or right and vice-versa. Or tap the Key. You can add extensions to the home screen by dragging an app, folder, or widget to the location you want on the screen. To remove an item, drag it to the Remove option. Items that you have added will not be removed from the Apps list. You can also add more panels to the extended home screen.

In the bottom pane, there will be five launcher icons for you to open different sections in the phone. Except the application launcher in the middle of the panel, you can rearrange and manage the other four icons. Tap and hold the application icon and then you can rearrange, change or remove it with ease.

Know More About Widgets...

Widgets allow placing application shortcuts on your home screen. You can place analog clock, your recent call logs, and other such sections of your phone on the home page, and access them directly. View all available widgets by tapping the key from the home screen and then tapping **Widgets**.

Application Launcher

Application launcher or Application menu is available right in the middle of the home screen bottom pane.

Tap to view all installed and installed applications. In the application launcher, you can find any application to take it to the home screen, release the hold to place at any desired location on the home screen.

Account Configuration

Google Account

Go to > .

Some applications and services of your smartphone may require you to sign in to your Gmail account. If you do not have an existing Gmail account, you can create one. You can also create a Gmail account from the Gmail app in your phone.

Configuring Gmail account will not only allow you to access your emails but will also enable you to sync your phone calendar and contacts with your Gmail account. Also, you will be able to use Google Drive to store files and get easier. In addition to this, your Gmail Account lets you take full advantage of applications and services offered by Google on your Android phone. Configure your Google account on this handset to get an ease of access to and sync your preferences and data on some applications rendered by Google.

Network connection is required for a successful Gmail account configuration.

Other Accounts

In addition to Gmail, you can configure other email accounts from:

Go to > **Accounts** > **Add account**

Also, you can download desired email application from the Play Store and access emails from the respective application.

Notifications

Notifications get listed in the notification panel for all events, such as missed calls, new messages, as and when they happen in the device. Also, you can now view notifications from the lock screen directly.

Open Notification Panel

Swipe down to open the notification panel.

Close Notification Panel

Swipe up to close the notification panel.

Swap between the Notifications and Toolkit

Swipe left or right to swap between the notifications and toolkit.

You can swipe up and down to navigate between the two sections.

View Application Details

Long tap a notification to view the notification processing application. For example, "Phone" will generate "Missed call" notification.

When you receive a notification, its icon appears in the status bar, along with a brief summary. You may clear each notification separately by swiping it towards left or right.

Toolkit provides you shortcuts to manage basic phone features, such as Airplane Mode, Wi-Fi, Display Brightness, and many more.

Clear All Notifications

Tap the 'Clear' key to clear all the notifications.

Open Toolkit Panel

Use two fingers to drag down the notification panel.

Gravity Sensor

Your phone has gravity sensor to detect gravity and display current orientation between the modes.

You can enable/disable the auto-rotate feature by tapping **Auto-rotate** on the toolkit quick access panel.

OR

You can enable/disable the auto-rotate feature from:

Go to > **Display** > **When device is rotated**

Phone Security

Unlock the Screen

By default, Swipe Unlock is your unlocking technique.

To unlock:

1. Wake up the screen by firmly pressing the Power key.
2. Place your finger on the lock icon and swipe up to unlock the screen.

Protect your phone from unauthorized access. Once locked, the phone can be unlocked by providing the unlocking password set while choosing the unlocking technique.

Phone Unlocking Methods

Choose and set a unlocking technique from:

Go to > **Security** > **Screen lock**

It is important to remember the passwords and commands, which you set for your phone. A forgotten password cannot be retrieved.

Voice Unlock

Set up voice commands to unlock the phone. Also, you can set wake up commands to launch any application directly from the unlocked phone.

PIN

Set a PIN of atleast four digits as the password to unlock.

Pattern

Connect the dots to form a pattern and use the same to unlock.

Password

Set and use an alphanumeric password of atleast 4 characters to unlock the phone.

Smart Lock

Smart Lock feature allows you to disable the applied phone unlock method when connected to a specific device or the handset is at a specific place or using the face unlock method.

You may set these smart lock methods from:

Go to > **Security** > **Smart Lock**

The Smart Lock option will get unlocked only when you apply a screen lock method other than "Swipe".

Smart Lock

Smart Lock feature allows you to disable the applied phone unlock method when connected to a specific device or the handset is at a specific place or using the face unlock method.

You may set these smart lock methods from:

Go to > **Security** > **Smart Lock**

The Smart Lock option will get unlocked only when you apply a screen lock method other than "Swipe".

Google Search

Google Search is available on the home screen and in the application menu too.

You can type your search keywords or can even speak up as your search keywords. Google search will show you the voice commands to access various useful sections on your handset.

Using the Touch Screen

Tap and Hold

Tap and hold an item to view the list of actions based on the selected item and conditions. Also, you can move an item from the Apps screen to the home screen using this method.

Drag an Item

Tap and hold an item and move your finger on the screen until you reach the target position. The item follows your finger.

You can generally drag items from one location to another on the home screen. Also, you can delete items from the home screen by holding the item and dragging it to the **Remove** option that becomes available only when you hold the item on the Home screen.

Swipe

Place a finger on the screen and steadily slide your finger in the desired direction.

For example, when you are viewing a picture, to view the next picture, swipe left.

Using the Pinch Zoom

You can open and enlarge a web page and then use your thumb and index finger to zoom in/out through the pinch gesture.

Double-tap

Tap quickly twice on a webpage, map, or other screen to zoom. For example, double-tap a section of a webpage in the browser to zoom that section.

Using the Onscreen Keyboard

Some applications display the keyboard by default. In others, you will be required to tap a text field, where you want to enter text, to open the keyboard.

Tap to change the sentence casing
Tap to switch to numeric keyboard with symbols
Tap to erase the entered text
Long tap to view input options.
Tap to view the keyboard.

Recent Applications

Tap and hold the key to view the list of recently used applications. You can then tap an application to open it or swipe it left or right to remove it from your recent applications list.

There are two ways to remove items from the list.

Drag an item towards left or right

Tap the X (close) icon on the item.

Make a Call

Tap > on the home screen or the home screen to open the dialpad for making calls.

By default, the dialer will display a list of contacts on which calls have been made very often and the contacts which have been marked as favorites.

You can enter a number directly, or tap the contacts to swipe towards left. You can view the dialpad by tapping .

Contacts

Go to > .

Store, use, and synchronize contact details in your contact list. You can synchronize the contacts in your phonebook, on web or merge with and sign in to view the list of contacts and favorite contacts list.

Add a new contact to the contacts list by tapping icon and then entering the contact name, number and details in the respective fields.

Synchronize Your Contact List

You can synchronize your contacts list with any of your accounts configured on this device.

To synchronize your contact list:

1. Tap the key while on the contacts screen and then tap **Accounts**.
2. Select or add the account(s) with which contact list is to be synchronized.

Your contacts synchronization will take few seconds to complete.

To synchronize contacts, you need to have Internet connectivity via your SIM or Wi-Fi. If your Sync does not proceed as expected, check network connectivity.

Airplane Mode

Some locations may require you to disable all the network-related functions of your mobile. The Airplane Mode allows you to disable all incoming and outgoing calls, Wi-Fi, and Bluetooth connections.

To activate the airplane mode:

Open the toolkit panel and tap **Airplane mode** option.

Send Message

To send a message:

1. Tap on the menu screen or the home screen to go to the messaging section and then tap to compose a message.
2. Tap the to view the types of files that can be attached and then select the file to be attached.
3. Tap to select the composition text box and enter your message to be sent.
4. Enter the contact name (if it exists) or enter the phone number. You can tap the icon to view and select contact(s) from the contact list.
5. Tap to send the message.

Camera

Go to > .

Gallery

Go to > .

You can use the Gallery to view pictures, play videos, and share files. Tap an album to open its contents.

Music Player

Go to > .

FM Radio

Go to > .

You can listen to your favorite FM channels using the inbuilt FM receiver of your device. Please note that the wired headset that you use with your device works as antenna for the FM radio. Use the intuitive icons in the radio interface to enjoy the features of your inbuilt FM radio.

Press the phone's volume up/down keys on the right side of the phone to adjust the volume.

Settings, Networks, & Applications

Your phone can connect to networks and devices, including Internet, Wi-Fi, and Bluetooth devices, and USB accessories. You can also transfer files to/from PC through the data cable.

Go to > .

Connect to the Internet

To configure Internet, go to > > **Data Usage** and tap the SIM connection on which data connection is to be enabled. Under the selected SIM tab, tap and select the **Cellular data** option.

You may also need to configure the access point name for the data connection to work.

To configure the access point name from:

> > **More** > **Cellular networks** > **Access Point Names**

By default, the access point name gets configured once you insert the SIM or your network provider sends the access point name settings to you. You can add a new access point name only if the access point names are not listed by default, please contact your network provider for the same.

Tethering & Portability

You can use your Q391 as a modem and connect your PC or laptop to the Internet using the tethering feature. You can share your SIM data connection, PC-to-Laptop connection.

Go to > **More** > **Tethering & portable hotspot**.

USB Tethering

1. Connect your phone with your PC/Laptop via USB cable.
2. Enable the **USB tethering** option.
3. Select your phone network as the network connection in your PC/laptop and get access to the Internet.

Bluetooth Tethering

1. Pair your phone with the Bluetooth enabled PC/Laptop via Bluetooth pairing process.
2. Enable the **Bluetooth tethering** option in your phone.
3. On the paired PC/Laptop, select the Bluetooth device (your phone) and choose to connect to the Internet.

Wi-Fi Hotspot

1. Turn on the **Wi-Fi hotspot** option in your phone.
2. On the other Wi-Fi enabled PC/laptop/handset, choose your phone as a Wi-Fi network to connect to the Internet.
3. View and configure Wi-Fi hotspot settings by tapping the **Wi-Fi hotspot** option.

Your mobile operator will charge you based on your data usage.

Pair With Bluetooth Devices

Go to > > **Bluetooth**

To pair your Q391 with some other Bluetooth device:

1. If Bluetooth is off, tap **Bluetooth** and turn it on. Your phone scans and displays the list of Bluetooth devices in range.
2. Tap the device you want to pair with from the list.
3. You will be prompted to confirm passkey on both devices. Tap **Pair** to confirm the passkey and pair the devices. On successful pairing, your phone connects to the device.

If the device you want to pair with is not in the list, make it discoverable and then tap the icon on the Bluetooth screen and select **Refresh**.

Google Maps

Google Maps is an app from Google that gives you access to various map-related services. You can view your location on a map, search for different businesses, get directions to locations, and even view Street View photos from around the world. The built-in navigation works with GPS to find your location and provide directions. Also, Google Maps can be downloaded maps so you can view them when you have no connection. For the best experience with Google Maps, configure the following settings.

Enable location access from > > **Location.**

Internet connection is required for using Google Maps. When you use the map, you use your Internet connection to transfer data to your handset.

The Google Maps application may not be available in every street, city, or country.

Micromax does not guarantee the accuracy of any directional services

Manage Applications

Your phone comes with a host of applications to make your life easier and more convenient. The phone offers a number of default applications, entertainment sources. You can download applications, games, movies, and more from the Google Play Store and install them on your phone. To add/ extend slots to the Play Store to give users a never-ending list of experience.

To view and manage the list of all inbuilt, downloaded, and running applications, go to > > **Apps**.

To download applications, games, movies, and books from the Google Play Store, go to > > and open the Google Play Store. View the details and download items, as desired.

Not all items are free of cost in the Google Play Store.

You need to have an Internet connection and be signed in to your Google Account to use the Google Play Store.

Safety Precautions

Switch off your device in any area with potential explosive atmosphere and obey all signs and instructions. Sparks in such areas may cause fire or explosion. Therefore switch off your device at refueling points (gas stations) and comply with restrictions in fuel depots, chemical plants or in areas where blasting operations are in progress. Areas with potentially explosive atmosphere are often but not always clearly indicated. They include areas where you would normally be advised to switch off your vehicle engine, areas below deck on boats, chemical transfer or storage facilities and areas where the air contains chemicals or particles, such as grain, dust or metal powders.

Always keep the phone and accessories out of reach of small children. Small parts may cause choking if detached and could also be dismantled and swallowed by small children.

Do not place the phone near electromagnetic data carriers such as credit/debit cards. Information stored on them may get lost.

Permanent damage to hearing may occur if you use earphones at high volume for prolonged periods. Set your volume to a safe level. If you experience hearing discomfort in your ears, reduce the volume or discontinue the use of your earphones.

Manufacturers of medical devices recommend a minimum separation of 15 cm between a mobile device and a pacemaker. An impacted medical device such as a pacemaker or defibrillator to avoid issues arising out of radio frequency interference.

The mains voltage (V) specified on the power supply unit must not exceed the voltage specified on the rating plate. Also, the power supply must be plugged into an easily accessible AC power socket-outlet nearby.

You may also open the phone to replace the battery (if not sealed) or to upgrade the software or hardware components. Only use Micromax approved accessories.

The phone may cause interference in the vicinity of TV sets, radios and PCs.

Only use Micromax specified batteries and charging devices. The battery may cause damage, injury or burns if a conductive material such as jewelry, keys or beaded chains touches the exposed terminals. The battery may overheat, start smoking or explode. Only use the battery for the system for which it is specified. Do not use the battery if it is damaged. Do not charge the battery with devices not specifically approved.

Do not use the phone while driving. When you have to use the phone, please use the earpiece.

Please put the phone safely in the phone. Do not put it in areas where passenger seat or any place from which it may fall down during collision or emergency braking.

Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight.

The phone must be repaired by Micromax authorized personnel only. Repairing this phone by yourself other than our authorized service agents/centers gives warranty the warranty rules.

Taking Care of Your Device

Your device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your phone:

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and allow it to dry completely before replacing it.
- Do not store the device in high or cold temperatures. Extreme temperatures can shorten the life of electronic devices and damage batteries.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not paint your device (wear more magnetic fields to allow your device to come in contact with magnetic fields for extended period of time.

Note: Micromax will not bear any responsibility for any incompliance with the above-mentioned guidelines or improper usage of the mobile phone.

Battery Recommendations

- Please put the battery in a cool and well-ventilated place out of direct sunlight. We recommend you to charge the battery at room temperature 20°C.
- Please remove the battery from the charger once the device is fully charged to prevent unnecessary battery drain because the battery life is also shortened by overcharging. Remove the battery if the device is not in use for long time.
- Use Micromax approved batteries, chargers, accessories and supplies. Micromax will not be held responsible for any issues caused by using unapproved accessories or supplies.
- Do not discard the battery with household trash. Please dispose of used battery according to your local environmental laws and guidelines.

Recycle your Phone

The WEEE logo (shown at the left) appears on the product or packaging to inform you that at the end of life that this product must not be disposed off or discarded with your other household wastes. You are liable to dispose off all your WEEE by handing it over to a designated collection point for the recycling of hazardous waste or equipment. For more information on your WEEE disposal, contact your local city office, your household waste disposal service or the shop where you purchased the product.

Collection and proper recovery of your electronic waste equipments at the time of disposal will help conserve natural resources and ensure that all the electronic waste equipment will ensure safety of human health and environment. For more information on best practices for disposal of WEEE, visit www.micromaxinfo.com (sign in with your email id and password and visit My Grievances).
